SAFFRON ENERGY PLC

CHAIRMAN & CHIEF EXECUTIVE OFFICER'S STATEMENT

Following its Initial Public Offering in February 2017 as an Italian gas producer, Saffron Energy plc is now positioned as an exciting growth focused pan Euro Asian gas explorer.

Since its IPO, Saffron made solid operational progress, extending the Shell offtake agreement in Italy and securing first gas and commercial production at Bezzecca in addition to operating its existing production concession Sillaro. The Company also advanced its Sant' Alberto licence with the granting of a production concession in October 2017 whilst benefitting from very strong Mediterranean gas prices (achieving an average gas sales price of €19.62 per megawatt hour during 2017). Full year revenues came in at €1.389M.

Following the signature of heads of terms in October 2017, the Company will change its name to Coro Energy Plc following approval by the shareholders at the AGM, secured £14M institutional funding, upgraded its Board and announced a two pronged strategy:

i) Italian consolidation and expansion

The SEHIL Acquisition will substantially increase the Company's hydrocarbon asset base and will create a balanced portfolio of production, development and exploration stage assets, along with the associated fixed plant infrastructure. The combined Italian portfolio will contain total 2P (Proved and Probable) gas reserves of approximately 205.10 MMscm and 2C (Contingent) gas resources of approximately 660.20 MMscm and total 2C oil resources of 2.40 MMBbls. The Directors believe that Italy remains an attractive market with gas and oil of high quality, an accessible and low-cost transportation network and a pricing environment that has been stable and higher than other comparable European countries.

ii) South East Asian exploration

South East Asia has some of the fastest developing economies in the world which combined with increasing regional gas shortages and recent underinvestment in exploration present a compelling investment proposition at this point in the cycle.

Building upon the expertise and connectivity of its new team, Saffron has therefore initiated an international growth strategy focused on multi Tcf (trillion cubic feet), low cost, onshore gas piped to high value, in growing South East Asian markets.

To facilitate its growth strategy, the Company has introduced a series of high profile Director and Management appointments including:

- Mr James Parsons was appointed to the Board as Non-Executive Chairman. James is currently CEO of Sound Energy Plc and Non-Executive Chairman of Echo Energy Plc. He has over 20 years' experience in the oil and gas industry having started his career with the Royal Dutch Shell Group in 1994.

SAFFRON ENERGY PLC

CHAIRMAN AND CHIEF EXECUTIVE OFFICER'S STATEMENT (Cont'd)

- Mrs Fiona MacAulay was appointed to the Board as Non-Executive Director. Fiona is a Chartered Geologist and is currently CEO of Echo Energy Plc and brings with her over 30 years of experience in the oil and gas industry including prior roles as Chief Operating Officer and Technical Director. She is also the European President of the American Association of Petroleum Geologists.
- Mr Marco Fumagalli was appointed to the Board as Non-Executive Director. Marco is also a Non-Executive Director of Sound Energy Plc, Echo Energy Plc and CIP Merchant Capital Limited, the former of which supported the company with a cornerstone investment of £6M post period end.
- Mr Ilham Habibie was appointed to the Board post period end. Ilham is Indonesian and has been the CEO and President of a number of aerospace and other companies which he founded as well as being a Non-Executive Director of Sound Oil Plc (now known as Sound Energy Plc).
- Mr James Menzies. James is a qualified geologist with over 30 years' experience in the oil and gas industry. He is a specialist South East Asian explorer who founded Salamander Energy Plc, serving as CEO for 10 years before selling to Ophir Energy Plc in 2015 in a transaction that valued the business at \$850M.
- Mrs Sara Edmonson stepped up to CEO from Non-Executive Director to lead the Company through the acquisition of SEHIL and post period end will take the position of Deputy CEO following the introduction of Mr James Menzies as CEO effective as of 1 May 2018. Sara was previously CEO of ASX listed Po Valley Energy Ltd.

James Parsons
Non-Executive Chairman

Sara Edmonson
Chief Executive Officer

28 March 2018

SAFFRON ENERGY PLC

OPERATIONS REPORT

Production Assets

Production for the period was from the Company's Sillaro and Bezzecca gas fields. Bezzecca commenced commercial production in the second quarter of the year and in July increased further following the installation of a downhole choke.

Total Production for the year amounted to 7 million standard cubic metres of gas (circa 247 million standard cubic feet). Production in 2016 for the same period was 4.4 million standard cubic metres (circa 156 million standard cubic feet).

The development and tie in of the Bezzecca gas field was completed and commissioned in Q2 with first gas flows on 18 April and full commercial production commencing at a steady state from the Level A interval in mid-May 2017. Layer R was not put on production due to unexpected water production even at limited rates. Over the first two weeks of July, layer S was added to production and produced in comingle with layer A. Well production rates and pressure were adjusted in order to allow for increased aggregate production from both levels. During 4Q 2017, the Bezzecca 1 well began to show signs of early water cuts in the reservoir. In order to prevent field production decline and increase overall production, the decision was made to perform a water shut off operation to open level R, which represented approximately 70% of the original total 2P reserves. Level R is circa 16 meters thick and was perforated at 4 different intervals with a relatively thick clay seal between the top two and bottom two perforations. The water shut off operation which targeted the bottom two perforations and the associated tests was deemed successful. Production restarted with layer R initially with at a rate of 18,000 scm/day with limited water production. Bezzecca-1 is currently producing from layer A at an average of 15,000 scm/day with limited water production.

Sillaro production from the current C0 level has exceeded the 3P estimates published at the time of the February 2017 IPO of Saffron Energy Plc. This level is near depletion and is expected to be fully depleted within June 2018. Increased production at Sillaro will be driven by a planned deviation well from Sillaro 1dir to access remaining reserves and contingent resources in the Miocene and Pliocene levels.

Development Assets

In Q3, the Company secured a full production concession for the gas field Sant'Alberto. The Sant' Alberto licence covers an area of 19.51km² and is located very close to the Sillaro field. It requires a simple development, involving the installation of a modular gas processing facility and connection of this gas processing facility to the Italian national grid. The processing facility will comprise a separation and hydration system, nitrogen generation and a tank/vent. Completion of this development is expected within 2018.

SAFFRON ENERGY PLC

OPERATIONS REPORT CONT'D

2018. The Sant' Alberto production concession has 2P Reserves of 2.0 bcf (59.5 MMscm) and production capability is expected to peak at 29,500 scm / day.

Post period end, CGG has completed an evaluation of Saffron's reserves and associated value. As at 16 February 2018, the Company's ownership in its three existing Italian licenses had 2P reserves of 186.1 MMscm (6.5 Bcf) and resources of 102.4 MMscm (3.6 Bcf).

Enzo Vegliante
Production and Development Manager

28 March 2018

SAFFRON ENERGY PLC

FINANCIAL REPORT

During the 12 months to 31 December 2017, net production generated revenues of €1.389M. These revenue numbers were strengthened with the commercialisation of gas being produced from Bezzecca in the second quarter of the year. The Group's direct operating expenses were €1.117M, allowing the Group to make a small operating profit for the financial year in review.

Property, plant and equipment (comprising producing properties) as at end December 2017 stood at €2,148M while resource property costs, including exploration phase and production phase, stood at €1,904M. Non-cash impairments to the carrying value of the Group's assets have been provided for in the results for the year ended 31 December 2017 totalling €3.595M. Of this total impairment, €654k is against Sillaro and €2.941M against Bezzecca which is largely attributable to the sub-surface issues realised in the fourth quarter, which now appear to be resolved.

During the year, the Company raised total gross proceeds of £3,750,000. The Company raised £2,500,000 as it admitted to trading on AIM in February 2017. These funds were to be applied towards the development of the Company's two production licences and one near-term production concession. In September the Company raised a further gross amount of £1,250,000 with these proceeds being applied towards advancement and evaluation of new corporate growth opportunities as well as advancing initiatives to increase production at Sillaro and Bezzecca. A total of 85,907,500 new ordinary shares in the Company were issued over the period.

The Company continues to make repayment of vendor financing relating to the pipeline tie in for Bezzecca. This remains at a modest amount which is currently more than covered from production revenues and is paid monthly in equal instalments.

Post period end and in support of the proposed merger, new Board and launch of international growth strategy the Company announced it had secured conditional funding of £14,000,000. This was corner-stoned by new investor CIP Merchant Capital Limited. The Company closed a firm placing raising £561,138 with CIP in January 2018 and the balance of £13,438,862 remains conditional only subject to shareholder approval which is being sought contemporaneously with the approval for the proposed merger at the General Meeting scheduled for 29 March 2018.

Andrew Dennan
Chief Financial Officer

28 March 2018

SAFFRON ENERGY PLC

STRATEGIC REPORT

The Directors of the Company and its subsidiary undertaking (which together comprise “the Group”) present their Strategic Report on the Group for the year ended 31 December 2017.

Organisation Review

The Board is responsible for providing strategic direction for the Group. This incorporates setting out objectives, management policies and performance criteria. The Board assesses its performance against these on a monthly basis.

Composition of the Board at 31 December 2017 was one Executive Director and three Non-Executive Directors and a Non-Executive Chairman. Following the period in review two additional Non-Executive Directors has been appointed to the Board. The Board believes that the present composition provides an appropriate mix to conduct the Group’s affairs.

During 2017, the Saffron board had been in discussions with Sound Energy and PVE to combine their interests in Italy as a way to develop a materially larger and well-funded natural gas and oil company with critical mass through a balanced portfolio of high quality assets. Post period end, the acquisition of PVO was mutually terminated and the Company proceeds to acquire SEHIL only. The assets of Saffron’s existing subsidiary Northsun Italia S.p.A (‘NSI’) and SEHIL are described below:

NSI

NSI, since 24 February 2017 the Company’s wholly owned subsidiary, has a 100 per cent. interest in, and is the operator of, the Sillaro Licence and the Sant’ Alberto Licence. It also has a 90 per cent. interest in and is the operator of the Cascina Castello Production Licence, where the Bezzacca Field is currently being operated. Sillaro, Bezzacca and Sant’Alberto are all located in the Po Valley region of Northern Italy. Sillaro, Bezzacca and Sant’Alberto cover a combined area of approximately 65.5km² and together provide 2P (Proved and Probable) reserves attributable to the Group of 186.1 MMscm and 2C (contingent) resources of 102.4 MMscm. The Sillaro Field has been producing gas since 2010 and has further development potential, the Bezzacca Field has been producing since April 2017 and the Sant’Alberto Field is expected to commence production in the first half of 2019. (Source: pages 13-14, 28, 32, 39 and 48-49 of the Competent Person’s Report).

SEHIL

SEHIL owns 100 per cent. of Apennine Energy SpA (‘APN’), through which it holds its Italian assets. APN has a 100 per cent. interest in, and is the operator of, the Rapagnano gas field. This field was first discovered in 1952 and had a cumulative historical production of 124.2 MMscm (as at 31 October 2017). APN also has a 100 per cent. working interest and, subject to registration of a transfer to it of the remaining 25 per cent., a 100 per cent. legal interest in and is the operator of San Lorenzo. APN also has a 100 per cent. interest in Carità, D.R74.AP,

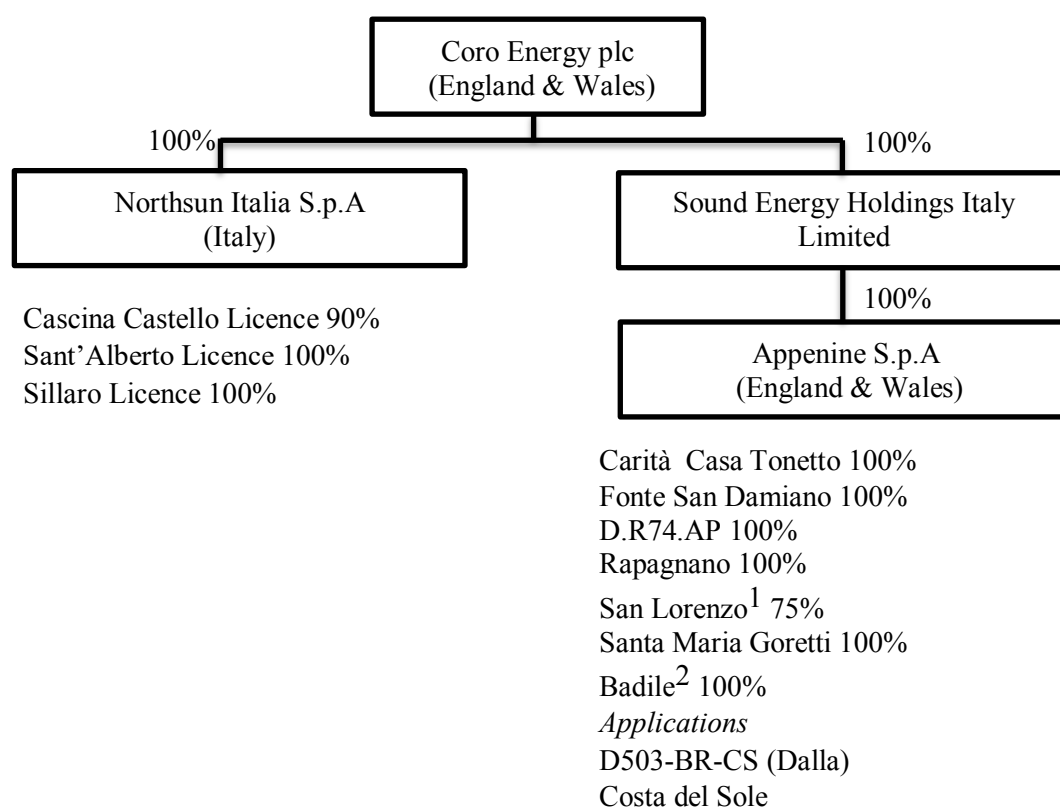

Fonte San Damiano, Santa Maria Goretti, and Badile (which was considered to be non-commercial and is to be restored at Sound Energy’s cost as further described in paragraph 15.13 of Part 6 of this document). SEHIL has also submitted applications in respect of D503- BR-CS (Dalla) and Costa Del Sole. All of APN’s assets are situated along the east coast of Italy, other than Costa Del Sole, which is located on the South West coast of Sicily and Badile, which is located in North West Italy. Together, they provide 2P (proved and probable) reserves of 19.0 MMscm and 2C (contingent) gas resources attributable to SEHIL of 557.8 MMscm of gas and 2.4 MMbbls of oil. (Source: pages 15-18, 20, 53 and 57 of the Competent Person’s Report).

Following the SEHIL Acquisition, in aggregate, the Company will own 2P (proved and probable) gas reserves of 205.10 MMscm, 2C (contingent) gas resources of 660.20 MMscm, and 2C oil resources of 2.40 MMbbls. (Source: page 16 of the Competent Person’s Report).

SAFFRON ENERGY PLC
STRATEGIC REPORT (Cont'd)

The SEHIL Acquisition Agreement is conditional on (amongst other things): (i) completion of a new equity issue; (ii) shareholder approval; (iii) approval by the shareholders of Sound Energy of the Sound Capital Reduction (which was obtained, subject to court approval, on 8 February 2018); and (iv) Admission on the enlarged entity to trading on AIM. Under the terms of the SEHIL Acquisition Agreement, Sound Energy will retain: (i) its economic rights to receive the proceeds of any future sale of the land comprising Badile (the “**Badile Land**”), which had an unaudited carrying value of £1.6 million as at 30 June 2017; and (ii) the benefit of expected SEHIL Italian VAT receivables totaling €4.0 million linked to Badile drilling costs. Under the Proposed SEHIL Transaction, the Company has undertaken to remit the net proceeds of the Badile Land sale and the VAT rebate to Sound Energy on receipt by SEHIL. Furthermore the Company has agreed to grant Sound an overriding royalty of 5 per cent. on all revenue that may be derived from any wells drilled in D.R74.AP. A more detailed summary of the terms of the SEHIL Acquisition Agreement is set out in the Supplementary Admission document published by the Company on the 7th March 2018.

As a result of the acquisition the group structure and assets held therein is depicted as follows;

1. 75% legal interest held pending registration of transfer of legal interest; 100% working interest held
2. The Badile drill site is to be restored at the cost of Sound.

Strategic Approach

The Board’s strategic intent is to maximise shareholder value through the development of a portfolio of production licenses in Italy and the execution of new acquisitions in Europe and South East Asia.

Saffron provides shareholders with exposure to the high growth associated with the junior oil and gas sector.

SAFFRON ENERGY PLC
STRATEGIC REPORT (Cont'd)

Key Performance Indicators

The Board monitors the overall performance of the Group by reference to Key Performance Indicators (“KPIs”). KPIs for the year, are presented below:

	2017	2016
Revenue	€1,389,000	€701,000
Gross profit margin (excluding depreciation)	19.6%	37.2%
Earnings per Share	€ (0.046)	€ (162.18)

Risks and Uncertainties

The Group’s activities expose it to a variety of risks and uncertainties.

External Risks:

Macroeconomic risk

Any economic downturn either globally or locally in any area in which the Group operates may have an adverse effect on the demand for the Group’s products and services. A more prolonged economic downturn may lead to an overall decline in the volume of the Group’s sales, restricting the Group’s ability to realise a profit. The markets in which the Enlarged Group offers its products and services are directly affected by many national and international factors that are beyond the Group’s control.

Market perception

Market perception of junior exploration and extraction companies, in particular those operating in energy markets, as well as all oil and gas companies in general, may change in a way which could impact adversely the value of investors’ holdings and the ability of the Company or the Group to raise further funds through the issue of further Ordinary Shares or otherwise.

Gas Pricing

The Group operates in an international market for hydrocarbons and is exposed to risk arising from variations in the demand for and price of the hydrocarbons. Oil and gas prices historically have fluctuated widely and are affected by numerous factors over which the Group does not have any control, including world production levels, international economic trends, currency exchange fluctuations, inflation, speculative activity, consumption patterns and global or regional political events.

SAFFRON ENERGY PLC
STRATEGIC REPORT (Cont'd)

Changes to law, regulations or Government policy

Changes in law and regulations or government policy may adversely affect Saffron's business. Examples include changes to land access or the introduction of legislation that restricts or inhibits exploration and production. Similarly changes to direct or indirect tax legislation may have an adverse impact on the Group's profitability, net assets and cash flow.

The Group's strategy is to expand further into locations in South East Asia. These locations include Indonesia, a developing nation with a large number of ethnic and indigenous groups, whose fiscal and monetary controls, laws, policies and regulatory processes in many areas are less established than in developed nations, and where there is a wide range of policies, ideologies and attitudes between the numerous different political parties and candidates. Since the downfall of President Suharto in 1998, there have been five Presidents. The current President, Joko Widode, has been in power since October 2014.

The Group is exposed to the resultant risk of being adversely affected by possible political or economic instability in Indonesia through civil war, war, terrorism, military repression, expropriation, changes in mining or investment policies, laws and regulations, extreme fluctuations in currency exchange rates and high rates of inflation. The Group's operations are exposed to the political, economic, legal, regulatory and social risks of countries in which it operates or intends to operate. These risks potentially include expropriation (including "creeping" expropriation) and nationalisation of property, instability in political, economic or financial systems, uncertainty arising from undeveloped legal and regulatory systems, changes to legislation, corruption, civil strife or labour unrest, acts of war, armed conflict, terrorism, outbreaks of infectious diseases, prohibitions, limitations or price controls on hydrocarbon exports and limitations or the imposition of duties on imports of certain goods.

Some of the countries in which the Group may have opportunities to acquire exploration licences have transportation, telecommunications and financial services infrastructures that may present logistical challenges not associated with doing business in more developed locales. Furthermore, the Group may have difficulty ascertaining its legal obligations and enforcing any rights it may have. Certain governments in other countries have in the past expropriated or nationalised property of hydrocarbon production companies operating within their jurisdictions. Sovereign or regional governments could require the Group to grant to them larger shares of hydrocarbons or revenues than previously agreed to. Once the Group has established hydrocarbon exploration and/or production operations in a particular country, it may be expensive and logistically burdensome to discontinue such operations should economic, political, physical, or other conditions subsequently deteriorate. All of these factors could materially adversely affect the Group's business, results of operations, financial condition or prospects.

Uncertainty of timing of regulatory approvals

Delays in the regulatory process could hinder the Group's ability to pursue operational activities in a timely manner including drilling exploration and development wells, to install infrastructure, and to produce oil or gas. In particular, oil and gas operations in Italy are subject to both Regional and Federal approvals.

Operating Risks:

Exploration, development and production

On non-operated interests, the Group, in most instances, will depend on operators to initiate and supervise the drilling and operation of such wells. As such the Group cannot always accurately predict the timing of the cash flows associated with the drilling of these wells. If the Group is unable or unwilling to comply with its payment obligations, it would seek to negotiate a farm-out with some sort of back-in upon pay-out or sell down a portion of its leasehold interests and participate with a smaller interest. This could reduce the Group's future revenues and earnings.

SAFFRON ENERGY PLC
STRATEGIC REPORT (Cont'd)

Oil and gas exploration and production risks

The future value of Saffron will depend on its ability to find, develop, and produce oil and gas that is economically recoverable. The ultimate success or otherwise of such ventures requires successful exploration, establishment of commercial reserves, establishment and successful effective production and processing facilities, transport and marketing of the end product. Through this process, the business is exposed to a wide variety of risks, including failure to locate hydrocarbons, changes to reserve estimates or production volumes, variable quality of hydrocarbons, weather impacts, facility malfunctions, lack of access to appropriate skills or equipment and cost overruns.

Estimation of Reserves

The estimation of oil and natural gas reserves involves subjective judgments and determinations based on geological, technical, contractual and economic information. It is not an exact calculation. The estimate may change because of new information from production or drilling activities.

Health, Safety and Environmental matters

Exploration, development and production of oil and gas involves risks which may impact the health and safety of personnel, the community and the environment. Industry operating risks include fire, explosions, blow outs, pipe failures, abnormally pressured formations and environmental hazards such as accidental spills or leakage of petroleum liquids, gas leaks, ruptures, or discharge of toxic gases. Failure to manage these risks could result in injury or loss of life, damage or destruction of property and damage to the environment. Losses or liabilities arising from such incidents could significantly impact the Group's financial results.

Licences and title

The leases in which the Group has or is seeking to have an interest will be subject to termination after the primary term of such leases unless there is current production of oil and/or gas in commercial quantities. If a lease is not extended after the primary term, the Group may lose the opportunity to develop and discover any hydrocarbon resources on that lease area. In taking an assignment of an oil and/or gas lease, the Group would, in accordance with industry practice, rely on the warranty provisions.

SEHIL Acquisition

Completion of the SEHIL Acquisition is conditional upon, amongst other things: (a) the approval of the SEHIL Acquisition by Shareholders at the General Meeting; (b) court approval of the Sound Energy Capital Reduction (received 8th February 2018); (c) various other standard conditions including receipt of any required regulatory approvals; and (d) Admission occurring. There can be no guarantee that all of these conditions will be satisfied, or that all other completion requirements will be met, and therefore no guarantee that the SEHIL Acquisition will complete. If the SEHIL Acquisition does not complete, the Company would nonetheless incur expenses, including advisory fees, in connection with the SEHIL Acquisition. In addition, in the event that the SEHIL Acquisition does not proceed the Company would expect or be required to seek confirmation from Subscribers (and Turner Pope would be required to seek confirmation from Placees) that they wish to maintain their respective commitments as regards the Subscription and the Placing (as relevant). There can be no assurance that such confirmation would be given by Placees and Subscribers in any such circumstance.

SAFFRON ENERGY PLC
STRATEGIC REPORT (Cont'd)

Dependence on key executives and personnel

The future performance of the Group will to a significant extent be dependent on its ability to retain the services and personal connections or contacts of key executives and to attract, recruit, motivate and retain other suitably skilled, qualified and industry experienced personnel to form a high calibre management team. Such key executives are expected to play an important role in the development and growth of the Group, in particular by maintaining good business relationships with regulatory and governmental departments and essential partners, contractors and suppliers.

There is a risk that the Group will struggle to recruit the key personnel required to run an exploration and appraisal programme. Shortages of labour, or of skilled workers, may cause delays or other stoppages during exploration and appraisal activities. Many of the Group's competitors are larger, have greater financial and technical resources, as well as staff and facilities, and have been operating in a market-based competitive economic environment for much longer than the Group. There can be no assurance that the Group will retain the services of any key executives, advisers or personnel who have entered, or will subject to Admission enter, into service agreements or letters of appointment with the Group. The loss of the services of any of the key executives, advisers or personnel may have a material adverse effect on the business, operations, relationships and/or prospects of the Group. The Group currently has no key-man insurance policy in place and, therefore, there is a risk that the unexpected departure or loss of a key individual could have a material adverse effect on the business, financial condition and results of operations of the Group and there can be no assurance that the Group will be able to attract or retain a suitable replacement.

Risks associated with the need to maintain an effective system of internal controls

The Group's future growth and prospects will depend on its ability to manage growth and to continue to maintain, expand and improve operational, financial and management information systems on a timely basis, whilst at the same time maintaining effective cost controls. Any damage to, failure of or inability to maintain, expand and upgrade effective operational, financial and management information systems and internal controls in line with the Group's growth could have a material adverse effect on the Group's business, financial condition and results of operations.

Funding risks

The Group may in the future need to raise additional funds to implement its strategy. There can be no assurance that the required funding will be available at an acceptable price or at all. If the Company opts to raise finance through the issue of Ordinary Shares or other equity securities, Shareholders could suffer a dilution in their interest in the Company. Failure to raise the required funds could have a material adverse effect on the Group's business, operating results and financial condition.

Foreign subsidiaries

The Company conducts and expects to conduct its operations through various subsidiaries including SEHIL, APN and NSI. Therefore, the success of the Group in the near term will be dependent on distributions from such subsidiaries to the Group in order that it may meet its obligations. The ability of such subsidiaries to make payments to the Company may be constrained by, among other things, the level of taxation, particularly in relation to corporate profits and withholding taxes, and the introduction of exchange controls or repatriation restrictions or the availability of hard currency to be repatriated.

Tax risks

The Group is subject to taxation and in a number of jurisdictions the application of such taxes may change over time due to changes in laws, regulations or interpretations by the relevant tax authorities. Any such changes may have a material adverse effect on the Group's financial condition and results of operations.

SAFFRON ENERGY PLC
STRATEGIC REPORT (Cont'd)

Insurance coverage and uninsured risks

While the Board will determine appropriate insurance coverage, it may elect not to have insurance for certain risks due to the high premium costs associated with insuring those risks or for other reasons, including an assessment in some cases that the risks are remote or that cover is not available. No assurance can be given that the Group will be able to obtain insurance coverage at reasonable rates (or at all), or that any coverage it or the relevant operator obtains and proceeds of insurance will be adequate and available to cover any claims arising. The Group may become subject to liability for pollution, blow-outs or other hazards against which it has not insured or cannot insure, including those in respect of past activities for which it was not responsible. The Group intends to exercise due care in the conduct of its business and obtain insurance prior to commencing operations in accordance with industry standards to cover certain of these risks and hazards. However, insurance is subject to limitations on liability and, as a result, may not be sufficient to cover all of the Group's losses. The occurrence of a significant event against which the Group is not fully insured, or the insolvency of the insurer of such event, could have a material adverse effect on the Group's business, financial condition, results of operations and prospects. Any indemnities the Group may receive from such parties may be difficult to enforce including if such sub-contractors, operators or joint venture partners lack adequate resources. In the event that insurance coverage is not available or the Group's insurance is insufficient to fully cover any losses, claims and/or liabilities incurred, or indemnities are difficult to enforce, the Group's business and operations, financial results or financial position may be disrupted and adversely affected. Further, even where the Group is insured, its contractors may themselves be insufficiently insured, or uninsured, in respect of damage they may cause to the Group's property or operations. In such cases, the Group may be required to incur additional costs to extend its cover to its contractors, from whom it may be unsuccessful in recovering such costs in full or at all. The payment by the Group's insurers of any insurance claims may result in increases in the premiums payable by the Company for its insurance cover and adversely affect the Group's financial performance. In the future, some or all of the Group's insurance coverage may become unavailable or prohibitively expensive.

Future litigation

From time to time, the Group may be subject, directly or indirectly, to litigation arising out of its operations. Damages claimed under such litigation may be material or may be indeterminate, and the outcome of such litigation may materially impact the Group's business, results of operations or financial condition. While the Group assesses the merits of each lawsuit and defends itself accordingly, it may be required to incur significant expenses or devote significant resources to defending itself against such

This report was approved by the Board on 28 March 2018 and signed on its behalf:

James Parsons
Non-Executive Chairman

SAFFRON ENERGY PLC
REPORT OF THE DIRECTORS

The Directors present their Annual Report and the audited financial statements for the year ended 31 December 2017.

Directors and Directors' interests

- (1) Sara Edmonson is interested in 2,966,406 shares in Po Valley Energy Limited, representing a 0.50% interest in that company. If the Po Valley Energy Capital Reduction is proposed by PVE to its shareholders and completes (with Po Valley Energy distributing its entire holding of Ordinary Shares to its shareholders), Sara Edmonson will receive 500,018 Ordinary Shares, resulting in a total holding of 1,500,018 Ordinary Shares. The figures in the table above do not seek to reflect the results of the Po Valley Energy Capital Reduction.
- (2) James Parsons is interested in 3,192,283 shares in Sound Energy plc, representing a 0.31 per cent. interest in that company. On Re-Admission anticipated on 9 April 2018, he will be issued 584,150 Consideration Shares pursuant to the SEHIL Acquisition Agreement.
- (3) Marco Fumagalli holds no Ordinary Shares directly. Mr Fumagalli holds a 25 per cent. interest in Continental Investment Partners S.A, which has a 6.64 per cent. interest in Sound Energy plc and will hold 12,336,561 Ordinary Shares representing a 1.35 per cent. interest in the Company on Re-Admission. In addition, Mr Fumagalli is a director of and holds a 1.82 per cent interest in CIP Merchant Capital Limited. After the year end CIP has acquired 14,092,500 Ordinary Shares representing 7.05 per cent of the Existing Ordinary Shares. Following Re-Admission anticipated on 9 April 2018, CIP will be interested in 150,684,929 Ordinary Shares, representing 21.02 per cent. of the Enlarged Share Capital.
- (4) David Garland will be issued the Director Fee Shares on Re-Admission.

SAFFRON ENERGY PLC

REPORT OF THE DIRECTORS (Cont'd)

Directors' Remuneration

The Remuneration Committee of the Board of Directors is responsible for determining and reviewing compensation arrangements for all Directors and Senior Executives. The Remuneration Committee assesses the appropriateness of the nature and amount of emoluments of such officers on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high quality Board and senior executive team.

The following remuneration table comprises Directors' salaries and benefits in kind that were payable to Directors who held office during the year ended 31 December 2017:

	Salary (€)	Benefits in kind (€)	Bonus Payments (€)
Sara Edmonson	157,674	-	57,500
David Garland	13,092	4,300	17,100
James Parsons	2,280	-	-
Fiona MacAulay	1,322	-	-
Marco Fumagalli	1,322	-	-
Michael Masterman	67,394	-	-
Kevin Bailey	13,092	-	-
Christopher Johansen	13,092	-	1,482

Directors' and Officers' Indemnity Insurance

The Group has made qualifying third-party indemnity provisions for the benefit of its Directors and Officers. These were made during the previous period and renewed post period and remain in force at the date of this report.

Dividends

The Directors do not recommend the payment of a dividend.

Future developments

Future developments are included in the Chairman & Chief Executive Officer's Statement.

Information on financial instruments

Information on the financial instruments is disclosed in the Note 22 to the financial statements.

Substantial Shareholdings

The shareholders holding over 3% of the voting rights as at 31 December 2017 were as follows:

PO Valley Energy Limited – 100,000,000 shares. 50% ownership

SAFFRON ENERGY PLC

REPORT OF THE DIRECTORS (Cont'd)

Events after the Reporting Period

The events after the reporting period are set out in Note 28 to the financial statements.

Provision of Information to Auditor

So far as each of the Directors is aware at the time this report is approved:

- there is no relevant audit information of which the Company's auditor is unaware; and
- the Directors have taken all steps that they ought to have taken to make themselves aware of any relevant audit information and to establish that the auditor is aware of that information.

Independent Auditor

The auditor, PKF Littlejohn LLP will be proposed for reappointment at the forthcoming Annual General Meeting. PKF Littlejohn LLP has signified its willingness to continue in office as auditor.

This report was approved by the board on 28 March 2018 and signed on its behalf:

James Parsons
Non-Executive Chairman

SAFFRON ENERGY PLC

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The Directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations. Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors are required to prepare the Group and Parent Company Financial Statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union.

Under company law the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the state of affairs of the Parent Company and the Group as at the end of the financial year and of the profit or loss of the Group and the Parent Company for that period. In preparing these Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and accounting estimates that are reasonable and prudent;
- state whether the applicable IFRS's as adopted by the European Union have been followed; subject to any material departures disclosed and explained in the Financial Statements; and
- prepare the Financial Statements on a going concern basis unless it is inappropriate to presume that the Group and the Parent Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Group and Parent Company's transactions and disclose with reasonable accuracy at any time the financial position of the Parent Company and the Group and enable them to ensure that the Financial Statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Parent Company and Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the United Kingdom governing the preparation and dissemination of the financial statements may differ from legislation in other jurisdictions.

The Group is compliant with AIM Rule 26 regarding the Group's website.

This report was approved by the board on 28 March 2018 and signed on its behalf:

James Parsons

SAFFRON ENERGY PLC

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF SAFFRON ENERGY PLC

Opinion

We have audited the financial statements of Saffron Energy Plc (the ‘parent company’) and its subsidiaries (the ‘group’) for the year ended 31 December 2017 which comprise the Consolidated Statement of Comprehensive Income, the Consolidated and Parent Company Statements of Financial Position, the Consolidated and Parent Company Statements of Changes in Equity, the Consolidated and Parent Company Statements of Cash Flows and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union and as regards the parent company financial statements, as applied in accordance with the provisions of the Companies Act 2006.

This report is made solely to the company’s members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company’s members those matters we are required to state to them in an auditor’s report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone, other than the company and the company’s members as a body, for our audit work, for this report, or for the opinions we have formed.

In our opinion:

- the financial statements give a true and fair view of the state of the group’s and of the parent company’s affairs as at 31 December 2017 and of the group’s and parent company’s loss for the year then ended;
- the group financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union;
- the parent company financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor’s responsibilities for the audit of the financial statements section of our report. We are independent of the group and parent company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC’s Ethical Standard as applied to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the directors’ use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the group’s or the parent company’s ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our application of materiality

The scope of our audit was influenced by our application of materiality. The quantitative and qualitative thresholds for materiality determine the scope of our audit and the nature, timing and extent of our audit procedures. Group materiality was EUR74,000 based on a blend of revenue, results before tax and net assets. For each component in the scope of our group audit, we allocated a materiality that is less than our overall group materiality.

SAFFRON ENERGY PLC

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF SAFFRON ENERGY PLC (continued)

An overview of the scope of our audit

As part of designing our audit we determined materiality, as above, and assessed the risk of material misstatement in the Financial Statements. In particular, we looked at areas requiring the directors to make subjective judgements, for example in respect of significant accounting estimates including the carrying value of assets, and considered future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

A full scope audit was performed on the complete financial information of the Group's operating components located in United Kingdom and Italy, with the Group's key accounting function for all being based in Italy.

The Italian component was audited by a non-PKF network firm operating under our instruction. There was regular interaction with the component auditor during all stages of the audit, and we were responsible for the scope and direction of the audit process. The component auditor also provided their findings to us which were reviewed and challenged accordingly. This, in conjunction with additional procedures performed, gave us sufficient appropriate evidence for our opinion on the consolidated financial statements.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How the scope of our audit responded to the key audit matter
Carrying value of investments in subsidiaries	
Investments in subsidiaries total EUR 5.6 million and represent the largest asset within the Company's own financial statements. Recoverability is dependent on the future performance of the Company's subsidiaries which is in turn dependent on the successful recoverability of the resources. There is the risk that these investments may be impaired.	<p>We have performed an impairment review of the carrying value of the Group's interest in its subsidiaries. Out work included;</p> <ul style="list-style-type: none">• Reviewing the impairment indicators listed in IFRS including specific consideration of the economic viability of the assets held;• Obtaining and reviewing key external reports;• Obtaining support for ownership; and• Discussing with management the basis for non-impairment or impairment of the investment in subsidiaries. <p>Based on the audit work performed we do not consider the carrying value of the Group's investment in its subsidiaries to be materially misstated.</p>

SAFFRON ENERGY PLC

**REPORT OF THE INDEPENDENT AUDITOR
TO THE MEMBERS OF SAFFRON ENERGY PLC (continued)**

Key Audit Matter	How the scope of our audit responded to the key audit matter
Carrying value of resource property costs	
<p>The Group holds Resource Property assets of EUR 1.9 million. Support for the carrying values of these assets requires significant judgement and estimate by management of the Group’s ability and intention to be able to commercially develop the assets held. There is the risk that these capitalised property costs should be impaired.</p>	<p>We performed an impairment review of resource property costs which included;</p> <ul style="list-style-type: none"> • Obtaining title to said assets to ensure validity of ownership of the sites; • Considering the Group’s future plans for the various sites and the future activity levels planned thereon and the timeframe for such activity; • Considering whether there were any indicators that the carrying values were impaired including the results of any third party documents prepared for management; and • Considering the competency of any third party expert contracted to prepare a Competent Persons Report (“CPR”). <p>The “CPR” was prepared for the purposes of the proposed transaction. The finding of the CPR resulted in an impairment of EUR 4.3m to the carrying value of these amounts from EUR 6.2 million to EUR 1.9 million.</p> <p>Based on the audit work performed we do not consider the carrying value of resource property costs to be materially misstated within the financial statements</p>
Carrying value of production assets	
<p>The carrying value of the production assets of EUR 2.2 million requires significant estimates and judgements by Management of the Group’s ability to recover the assets value through use. The assets are key to the Group’s strategy and there is the risk that they are impaired.</p>	<p>We discussed the various plans for assets owner by the Group with management. We reviewed the underlying economic models and challenged the key assumptions therein including:</p> <ul style="list-style-type: none"> • Comparison of price assumptions to future prices; • Ensuring that the models were prepared by personnel with the relevant expertise to perform their work to the appropriate level of skill; • Challenging key inputs into the models including the discount rates used and benchmarking them where appropriate; and • Assessing carrying values by considering the range of valuations indicated by the differing scenarios. <p>Based on the audit work performed we do not consider the carrying value of production assets to be materially misstated within the financial statements.</p>

SAFFRON ENERGY PLC

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF SAFFRON ENERGY PLC (continued)

Key Audit Matter	How the scope of our audit responded to the key audit matter
Valuation of the site rehabilitation provision	
The rehabilitation provision of EUR 5 million is the Group's largest liability. Management uses its judgement and experience to provide for and amortise the estimated costs for decommissioning and site rehabilitation over the life of the site. The ultimate cost of decommissioning and site rehabilitation are uncertain and can vary significantly depending on the duration of the site life and the quantity of resources to be extracted from the site. There is the risk that the value of this provision is misstated.	<p>We obtained the calculation of the provision and:</p> <ul style="list-style-type: none">• Verified its mathematical accuracy;• Verified estimates to supporting documents where possible;• Challenged the estimate made;• Ensured all required rehabilitation obligations were included therein; and• Ensured that appropriate disclosures were made.. <p>Based on our audit procedures we consider that there are no matters on which to report in respect of the rehabilitation provision.</p>

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information. Our opinion on the group and parent company financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

SAFFRON ENERGY PLC

REPORT OF THE INDEPENDENT AUDITOR TO THE MEMBERS OF SAFFRON ENERGY PLC (continued)

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the group and the parent company and their environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the group and parent company financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the group and parent company financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: <http://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

NOTE 1: CORPORATE INFORMATION

Saffron Energy Plc (“the Company”) is a company incorporated in England in November 2016. The consolidated financial statements for the year ended 31 December 2017 comprises the Company and its interests in its 100% owned subsidiary and jointly controlled operations (together referred to as the “Group”).

The Group is primarily involved in the exploration, appraisal, development of and production from gas properties in the Po Valley region in Italy.

NOTE 2: BASIS OF PREPARATION

(a) STATEMENT OF COMPLIANCE

The financial Statements are prepared in accordance with International Financial Reporting Standards and IFRIC interpretations as adopted by the European Union and with those parts of the Companies Act 2006 applicable to companies reporting under IFRS.

(b) BASIS OF MEASUREMENT

These financial statements have been prepared on the basis of historical cost.

(c) GOING CONCERN

The financial statements have been prepared assuming that the Group will continue as a going concern. Under the going concern assumption, the entity is ordinarily viewed as continuing its business for the foreseeable future with neither the intention nor the necessity of liquidation, ceasing trading or seeking protection from creditors pursuant to laws or regulations.

The assessment has been made based on the Group’s economic prospects, which included those of the proposed enlarged group, which have been included in the forecast, in particular for 12 months from the date of approval of the financial statements.

Consideration has also been given in respect of development of the proposed fundraising. Based on the available information the Directors continue to adopt the going concern basis in the preparation of the financial statements.

(d) FUNCTIONAL AND PRESENTATION CURRENCY

The consolidated financial statements are presented in Euro, rounded to the nearest €1,000 (€’000), which is the Company’s and the Group entities functional currency.

Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss as finance income or expense.

Non-monetary assets and liabilities denominated in foreign currencies are translated at the date of transaction.

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(e) USE OF ESTIMATES AND JUDGEMENTS

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The Group based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market change or circumstances arising beyond the control of the Group. Actual results may differ from these estimates.

Estimates and underlying assumptions are based on complex or subjective judgments and past experience of other assumptions deemed reasonable in consideration of the information available at the time and are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

The estimates and judgements that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Reserve estimates

Estimation of reported recoverable quantities of Proven and Probable reserves include estimates regarding commodity prices, exchange rates, discount rates, and production and transportation costs for future cash flows. It also requires interpretation of complex geological and geophysical models in order to make an assessment of the size, shape, depth and quality of reservoirs, and their anticipated recoveries. The economic, geological and technical factors used to estimate reserves may change from period to period. The Group reserves and mineral resources based on information compiled by appropriately qualified persons relating to the geological and technical data on the size, depth, shape and grade of the reserve and suitable production techniques and recovery rates.

A change in any, or a combination of, the key assumptions used to determine the reserve estimates could have a material impact on the carrying value of the project via depreciation rates or impairment assessments. The reserve estimates are reviewed at each reporting date and any changes to the estimated reserves are recognized prospectively to depreciation and amortisation. Any impact of the change in the reserves is considered on asset carrying values and impairment losses, if any, are immediately recognized in the profit or loss.

Rehabilitation provisions

Costs relating to rehabilitation are many years in the future and the precise requirements this will have to be met when the removal event occurs are uncertain. Technologies and costs are constantly changing, as well as political, environmental, safety and public expectations.

The value of these provisions represents the discounted value of the present obligations to restore, dismantle and rehabilitate each well site. Significant estimation is required in determining the provisions for rehabilitation and closure as there are many transactions and other factors that will affect ultimate costs necessary to rehabilitate the sites. The discounted value reflects a combination of management's best estimate of the cost of performing the work required, the timing of the cash flows and the discount rate.

A change in any, or a combination of, the key assumptions used to determine the provisions could have a material impact on the carrying value of the provisions. The provision recognised for each site is reviewed at each reporting date and updated based on the facts and circumstances available at that time. Changes to the estimated future costs for operating sites are recognised in the statement of financial position by adjusting both the restoration and rehabilitation asset and provision.

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

Impairment of non-current assets

Assets are impaired when there are events or changes in circumstances that indicate the carrying values of the assets are not recoverable. The ultimate recoupment of the value of resource property costs and property plant and equipment is dependent on successful development and commercial exploitation, or alternatively, sale, of the underlying properties, all of which are subject to numerous variables. The Group undertakes at least on an annual basis, a comprehensive review for indicators of impairment of these assets. Should an impairment indicator exist, the Cash Generating Unit is tested for impairment. There is significant estimation involved in determining the inputs and assumptions used in determining the recoverability amounts.

The key areas of estimation involved in determining recoverable amounts include:

- Recent drilling results and reserves and resources estimates
- Environmental issues that may impact the underlying licences
- The estimated market value of assets at the review date
- Fundamental economic factors such as the gas price and current and anticipated operating costs in the industry
- Future production rates and sales prices

The estimated value in use is based on the present values of expected future cash flows net of disposal costs. The expected future cash flows used for impairment analyses are based on judgmental assessments of future production volumes, prices and costs, considering available information at the date of review and are discounted by using a rate that considers the risks specific to the asset.

The pre-tax discount rate used for impairment purposes is 10.0% and which reflects the current market valuation of the time value of money and of the specific risks of the asset not reflected in the estimate of the future cash flows. Further details are in note 16.

Recoverability of deferred tax asset

The recoverability of deferred tax assets is dependent on the availability of profits in future years. The Group undertakes a forecasting exercise at each reporting date to assess its expected utilisation of these losses.

The key areas of estimation involved in determining the forecasts include:

- Future production rates
- Economic factors such as the gas price and current and anticipated operating costs in the industry
- Capital expenditure expected to be incurred in the future

A change in any, or a combination of, the key assumptions used to determine the estimates could have a material impact on the carrying value of the deferred tax asset. Changes to estimates are recognised in the period in which they arise.

Carrying value of inventory

Historically inventory has been recorded at cost. In preparation of the year-end accounts, Management commissioned an independent appraisal of the Company's inventory. As a direct result, at 31 December 2017 the inventory balance represents the market value.

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

NOTE 3: SIGNIFICANT ACCOUNTING POLICIES

The Group has consistently applied the accounting policies set out in notes below to all periods presented in the financial statements. The Company's figures are for 14 months being the first reporting period for the Company from incorporation to 31 December 2017. See note 3a) for the explanation as to their being comparatives for the group.

All new and amended accounting standards and Interpretations effective from 1 January 2017 have been adopted.

(a) PRINCIPLES OF CONSOLIDATION

(i) Group reorganisation

In November 2016 a new parent company, Saffron Energy Plc, was introduced for the purposes of acquiring Northsun Italia S.p.A (the subsidiary) from the groups ultimate controlling entity Po Valley Energy Ltd.

The introduction of a new holding company constitutes a Group reconstruction and has been accounted for using merger accounting principles. Therefore, although the Group reconstruction become effective in January 2017, the consolidated financial statements of Saffron Energy Plc are presented as if Saffron Energy Plc had always been part of the same Group. Accordingly, the results of the Group for the entire year ended 31 December 2017 are shown in the consolidated financial statements and the comparative figures for the year ended 31 December 2016 are also prepared on this basis.

The consolidated financial statements include the results of Saffron Energy Plc and its subsidiary undertaking made up to the same accounting date. All intra-Group balances, transactions, income and expenses are eliminated in full on consolidation.

(ii) Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

Investments in subsidiaries are carried at cost less any impairment losses.

(iii) Joint arrangements

The Group classifies its interests in joint arrangements as either joint operations or joint ventures (see below) depending on the Group's rights to the assets and obligation for the liabilities of the arrangements. When making this assessment, the Group considers the structure of the arrangements, the legal form of any separate vehicles, the contractual terms of the arrangements and other facts and circumstances.

Joint operation - when the Group has rights to the assets, and obligations for the liabilities, relating to an arrangement, it accounts for each of its assets, liabilities and transactions, including its share of those held or incurred jointly, in relation to the joint operation.

(iv) Transactions eliminated on consolidation

Intra-group balances, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017

(b) TAXATION

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity or in comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the date of the statement of financial position, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of assets or liabilities that affect neither accounting nor taxable profit; and differences relating to investments in subsidiaries to the extent that the Company is able to control the timing of the reversal of the temporary difference and it is probable that they will not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities using tax rates enacted at the date of the statement of financial position.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Judgement is required to determine which arrangements are considered to be a tax on income as opposed to an operating cost. Judgement is also required to determine whether deferred tax assets are recognised in the statement of financial position. Deferred tax assets, including those arising from unutilised tax losses, require management to assess the likelihood that the Company will generate sufficient taxable earnings in future periods, in order to utilise recognised deferred tax assets.

Assumptions about the generation of future taxable profits depend on management's estimates of future cash flows. These estimates of future taxable income are based on forecast cash flows from operations (which are impacted by production and sales volumes, oil and natural gas prices, reserves, operating costs, decommissioning costs, capital expenditure, dividends and other capital management transactions) and judgement about the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realise the net deferred tax assets recorded at the reporting date could be impacted. In addition, future changes in tax laws in the jurisdictions in which the Company operates could limit the ability of the Company to obtain tax deductions in future periods.

(c) IMPAIRMENT

(i) Financial assets (including receivables)

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate.

Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed in groups that share similar credit risk characteristics.

All impairment losses are recognised in profit or loss.

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognised. For financial assets measured at amortised cost that are debt securities, the reversal is recognised in profit or loss.

(ii) Non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset (or CGU) may be impaired. Management has assessed its CGUs as being an individual field, which is the lowest level for which cash inflows are largely independent of those of other assets. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's or CGU's recoverable amount. The recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal (FVLCD) and value in use (VIU). The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the asset is tested as part of a larger CGU to which it belongs. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset/CGU is considered impaired and is written down to its recoverable amount.

The Group bases its impairment calculation on detailed budgets and forecasts, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecasts generally cover the forecasted life of the CGUs. VIU does not reflect future cash flows associated with improving or enhancing an asset's performance.

Impairment losses of continuing operations, including impairment of inventories, are recognised in the statement of profit or loss and other comprehensive income in those expense categories consistent with the function of the impaired asset.

For assets/CGUs, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's/CGU's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset/CGU does not exceed either its recoverable amount, or the carrying amount that would have been determined, net of depreciation/amortisation, had no impairment loss been recognised for the asset/CGU in prior years. Such a reversal is recognised in the statement of profit or loss and other comprehensive income.

(d) PROPERTY PLANT & EQUIPMENT

(i) Recognition and measurement

Items of property, plant and equipment are recorded at cost less accumulated depreciation, accumulated impairment losses and pre-commissioning revenue and expenses.

The cost of plant and equipment used in the process of gas extraction are accounted for separately and are stated at cost less accumulated depreciation and impairment costs.

Cost includes expenditure that is directly attributable to acquisition of the asset.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and are recognised within "other income" in profit or loss.

(ii) Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with expenditure will flow to the Group.

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

(iii) Depreciation

Gas producing assets

When the gas plant and equipment is installed ready for use, cost carried forward will be depreciated on a unit-of-production basis over the life of the economically recoverable reserve. The depreciation rate of gas plant and equipment incurred in the period for each project in production phase is as follows:

	2017	2016
Bezecca	3.40%	-
Sillaro	5.23%	11.29%

Oil and gas properties are depreciated using the UOP method over total proved developed and undeveloped hydrocarbon reserves. This results in a depreciation/amortisation charge proportional to the depletion of the anticipated remaining production from the field.

The life of each item, which is assessed at least annually, has regard to both its physical life limitations and present assessments of economically recoverable reserves of the field at which the asset is located. These calculations require the use of estimates and assumptions, including the amount of recoverable reserves and estimates of future capital expenditure. The calculation of the UOP rate of depreciation/amortisation will be impacted to the extent that actual production in the future is different from current forecast production based on total proved reserves, or future capital expenditure estimates change.

Changes to proven reserves could arise due to changes in the factors or assumptions used in estimating reserves, including:

- The effect on proved reserves of differences between actual commodity prices and commodity price assumptions
- Unforeseen operational issues.

Other property, plant and equipment

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. The depreciation will commence when the asset is installed ready for use.

The estimated useful lives of each class of asset fall within the following ranges:

Office furniture & equipment 3 – 5 years

The residual value, the useful life and the depreciation method applied to an asset are reviewed at each reporting date.

(e) FINANCIAL INSTRUMENTS

(i) Non-derivative financial instruments

Non-derivative financial instruments comprise investments in equity and debt securities, trade and other receivables, cash and cash equivalents, loans and borrowings and trade and other payables.

Non-derivative financial instruments are recognised initially as fair value plus, for instruments not at fair value through profit and loss, any directly attributable transaction costs. Subsequent to initial recognition non-derivative financial instruments are measured at amortised cost using the effective interest method, less any impairment losses.

A financial instrument is recognised if the Group becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the Group's contractual rights to the cash flows from the financial assets expire or if the Group transfers the financial asset to another party without retaining control or substantially all risks and rewards of the asset. Regular way purchases and sales of financial assets are accounted for at trade date, i.e. the date the Group commits itself to purchase or sell the asset.

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

Financial liabilities are derecognised if the Group's obligation specified in the contract expire or are discharged or cancelled.

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

(ii) Share Capital

Ordinary Shares

Ordinary shares are classified as equity. Incremental costs directly attributable to issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

Dividends

Dividends are recognised as a liability in the period in which they are declared.

(f) RESOURCE PROPERTY COSTS

Resource property costs are accumulated in respect of each separate area of interest.

(i) Exploration properties

Exploration properties are carried at date of statement of financial position at cost less accumulated impairment losses. Exploration properties include the cost of acquiring resource properties, mineral rights and exploration, evaluation expenditure incurred subsequent to acquisition of an area of interest.

Exploration properties are carried forward where right of tenure of the area of interest is current and they are expected to be recouped through sale or successful development and exploitation of the area of interest, or, where exploration and evaluation activities in the area of interest have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves and active and significant operations in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are assessed for impairment if sufficient data exists to determine technical feasibility and commercial viability or facts and circumstances suggest that the carrying value amount exceeds the recoverable amount.

Exploration and evaluation assets are tested for impairment when any of the following facts and circumstances exist:

- The term of the exploration license in the specific area of interest has expired during the reporting period or will expire in the near future, and is not expected to be renewed;
- Substantive expenditure on further exploration for an evaluation of mineral resources in the specific area are not budgeted nor planned;
- Exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the decision was made to discontinue such activities in the specific area; or
- Sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

Areas of interest which no longer satisfy the above policy are considered to be impaired and are measured at their recoverable amount, with any subsequent impairment loss recognised in the profit and loss.

(ii) Production properties

Production properties are carried at balance sheet date at cost less accumulated amortisation and accumulated impairment losses. Production properties represent the accumulation of all exploration,

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

evaluation and development and acquisition costs in relation to areas of interest in which production licences have been granted and the related project has moved to the production phase.

Amortisation of costs is provided on the unit-of-production basis, separate calculations being performed for each area of interest. The unit-of-production base results in an amortisation charge proportional to the depletion of economically recoverable reserves. The amortisation rate incurred in the period for each project in production phase is as follows:

	2017	2016
Bezecca	3.40%	-
Sillaro	5.23%	11.29%

Amortisation of resource properties commences from the date when commercial production commences.

When the value of the exploitable production property has diminished below cost, the asset is written down to its recoverable amount.

The Group reviews the recoverable amount of resource property costs at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated

(g) RESTORATION PROVISIONS

Long term environmental obligations are based on the Group's environmental and rehabilitation plans, in compliance with current environmental and regulatory requirements.

Full provision is made based on the net present value of the estimated cost of restoring the environmental disturbances that have occurred up to the date of the statement of financial position and abandonment of well sites and production fields. Increases due to additional environmental disturbances, relating to the development of an asset, are capitalised and recorded in resource property costs, and amortised over the remaining useful lives of the areas of interest. The net present value is determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and risks specific to the liability.

Annual increases in the provision relating to the unwind of the discount rate are accounted for in the statement of profit or loss as finance expense.

The estimated costs of rehabilitation are reviewed annually and adjusted against the relevant rehabilitation asset, as appropriate for changes in legislation, technology or other circumstances including drilling activity and are accounted for on a prospective basis. Cost estimates are not reduced by potential proceeds from the sale of assets.

(h) EMPLOYEE BENEFITS

(i) Long-term service benefits

The Group's net obligation in respect of long-term service benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. The obligation is calculated using expected future increases in wage and salary rates including on-costs and expected settlement dates and is discounted using the rates attached to the Government bonds at the balance sheet date which have maturity dates approximating to the terms of the Group's obligations.

(ii) Wages, salaries, annual leave, sick leave and non-monetary benefits

Liabilities for employee benefits for wages, salaries, annual leave and sick leave that are expected to be settled within 12 months of the reporting date represent present obligations resulting from employees

SAFFRON ENERGY PLC

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

services provided to reporting date, are calculated at undiscounted amounts based on remuneration wage and salary rates that the Group expects to pay as at reporting date including related on-costs, such as workers compensation insurance and payroll tax.

(iii) Superannuation

The Group contributes to defined contribution superannuation plans. Contributions are recognised as an expense as they are due.

(i) REVENUE

Revenues is measured at fair value of the consideration received or receivable, net of the amount of value added tax (“VAT”) payable to the taxation authority. Revenue is recognised when the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs can be estimated reliably, there is no continuing management involved with the goods, and the amount of revenue can be measured reliably.

Gas sales revenue is recognised when control of the gas passes at the delivery point. Proceeds received in advance of control passing are recognised as unearned revenue.

(j) INVENTORY – WELL EQUIPMENT

Inventory is comprised of well equipment expected to be utilised in future development of known wells with specific characteristics. Inventory is carried at cost less impairment. Any impairment on value is taken to profit and loss.

(k) CHANGES TO ACCOUNTING POLICIES, DISCLOSURES, STANDARDS AND INTERPRETATIONS

International Financial Reporting Standards and Interpretations issued but not effective for the reporting period ending 31 December 2017 which are relevant to the Group are outlined below:

Reference	Title	Summary	Application date of standard	Impact on financial statements	Application date for Group
IFRS9	Financial Instruments	<p><i>Classification and measurement</i></p> <p>In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments that replaces IAS 39 and all previous versions of IFRS 9. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Except for hedge accounting, retrospective application is required, but the provision of comparative information is not compulsory. The main changes to the Group accounting policy are described below:</p> <ul style="list-style-type: none"> Financial assets that are debt instruments will be classified based on (1) the objective of the entity's business model for managing the financial assets; (2) the characteristics of the contractual cash flows. 	1 January 2018	The application of this new standard will not have a material impact on the financial report, as the classification of the debt instruments will not change.	1 January 2018

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

Reference	Title	Summary	Application date of standard	Impact on financial statements	Application date for Group
IFRS 9	Financial Instruments	<p><i>Financial liabilities</i></p> <p>Changes introduced by this standard in respect of financial liabilities are limited to the measurement of liabilities designated at fair value through profit or loss (FVPL) using the fair value option</p> <p>Where the fair value option is used for financial liabilities, the change in fair value is to be accounted for as follows:</p> <ul style="list-style-type: none"> - The change attributable to changes credit risk are presented in other comprehensive income (OCI) - The remaining change is presented in profit or loss <p>The Standard also removes the volatility in profit or loss that was caused by changes in the credit risk of liabilities elected to be measured at fair value. This change in accounting means that gains or losses attributable to changes in the entity's own credit risk would be recognised in OCI. These amounts recognised in OCI are not recycled to profit or loss if the liability is ever repurchased at a discount.</p> <p><i>Impairment</i></p> <p>The standard introduces a new expected-loss impairment model that will require more timely recognition of expected credit losses. Specifically, the new Standard requires entities to account for expected credit losses from when financial instruments are first recognised and to recognise full lifetime expected losses on a more timely basis.</p>	1 January 2018	The application of this new standard will not have a material impact on the financial report as the Group does not hold FVPL liabilities.	1 January 2018
IFRS 15	Revenue from contracts with customers	<p>The Standard replaces IAS 18 and specifies the accounting treatment for revenue arising from contracts with customers. The core principle is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with that core principle by applying the following steps:</p> <ul style="list-style-type: none"> (a) Step 1: Identify the contract(s) with a customer (b) Step 2: Identify the performance obligations in the contract (c) Step 3: Determine the transaction price (d) Step 4: Allocate the transaction price to the performance obligations in the contract (e) Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation 	1 January 2018	The application of this Standard will not have a material impact on the financial report as the transaction price and performance obligations for the Group's revenue from contracts as determined under IFRS15 criteria will be the same as under the current standard IAS18.	1 January 2018

(I) SHARE-BASED PAYMENTS

Share based payments relate to transactions where the Group receives services and the terms of the arrangements include payment of a part or whole of consideration by issuing shares to the counterparty. The Group measures the services received from non-employees, and the corresponding increase in equity, at the fair value of the goods or services received. When the transactions are with the employees, the fair value is measured by reference to the fair value of the shares issued.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 4: FINANCIAL REPORTING BY SEGMENTS

The Group reportable segments as described below are the Group's strategic business units. The strategic business units are classified according to field licence areas which are managed separately. All strategic business units are in Italy. For each strategic business unit, the CEO reviews internal management reports on a monthly basis. Exploration, Development and Production gas and oil are the operating segments identified for the Group.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 12: INCOME TAX

12.1 INCOME TAX EXPENSE

Numerical reconciliation between aggregate tax expense recognised in the statement of profit or loss and other comprehensive income and tax expenses calculated per the statutory income tax rate

	Group	
	31 December 2017 €'000	31 December 2016 €'000
Loss for the year before tax	(7,027)	(6,472)
Income tax benefit using the Group tax rate of 24%	1,686	1,553
Current year losses and temporary differences for which no deferred tax asset was recognised	(613)	(204)
Changes in temporary differences	(154)	(393)
Other non-deductible expenses	(919)	(450)
	-	506
Income tax expense / (benefit)	-	506

12.2 DEFERRED TAX ASSETS

Deferred tax assets have been recognised in respect of tax losses and temporary differences based on management assessment that future taxable profit will be available against which the Group can utilise the benefits therefrom. Deferred tax assets amounting to €1,994,913 have been recognised in relation to the Italian subsidiary's available tax losses and temporary differences.

NOTE 13: EARNINGS PER SHARE

	31 December 2017	31 December 2016
Basic loss per share (€)	(0.046)	(0.85)
Diluted loss per share (€)	(0.046)	(0.85)

The calculation of basic loss per share was based on the loss attributable to shareholders of €7,027,000 (2016: €5,966,000) and a weighted average number of ordinary shares outstanding during the year of 152,665,466 (2016: 6,998,872).

On 7 March 2018, the Company announced GBP13.4 million share subscription was fully subscribed. The issue of shares as a result will impact the loss per share by dilution.

NOTE 14: TRADE AND OTHER RECEIVABLES

	Group	
	31 December 2017	31 December 2016
	€'000	€'000
Resource Property costs		
Exploration	1,745	5,003
Production	159	599
	1,904	5,602

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 16: RESOURCE PROPERTY COSTS (continued)

Reconciliation of carrying amount of resource properties:

	Group	
	31 December 2017	31 December 2016
<i>Exploration Phase</i>	€'000	€'000
Carrying amount at beginning of period	5,003	3,535
Acquisition of assets	-	268
Exploration expenditure	165	1,454
Transfer to Production phase	(2,524)	33
Change in estimate of rehabilitation assets	(131)	-
Impairment losses	(768)	(287)
Carrying amount at end of period	1,745	5,003

Resource property costs in the exploration and evaluation phase have not yet reached a stage which permits a reasonable assessment of the existence of, or otherwise, economically recoverable reserves. The ultimate recoupment of resource property costs in the exploration phase is dependent upon the successful development and exploitation, or alternatively sale, of the respective areas of interest at an amount greater than or equal to the carrying value.

During the period, the Group completed the development of the Bezzecca field. Accumulated costs relating to this field were transferred to production phase assets as production commenced in the second quarter of the year.

The Group reviewed the carrying value of its assets and cash generating units using a Value in Use CGU; in particular a valuation on Sant' Alberto was calculated by CGG Services (UK) Limited for the purposes of the Admission Document used for the restoration of trading of Saffron Energy Plc on the AIM Board of the LSE. As a result of this assessment, the recoverable value of Sant' Alberto at 31 December 2017 was €1.7million resulting in an impairment of €768k being recognised.

	Group	
	31 December 2017	31 December 2016
<i>Production Phase</i>	€'000	€'000
Carrying amount at beginning of period	599	3,350
Additions	782	64
Transfer from exploration	2,524	-
Acquisition of interest from related party	-	2,151
Change in estimate of rehabilitation assets	(86)	30
Amortisation of producing assets	(136)	(381)
Impairment loss	(3,524)	(4,615)
Carrying amount at end of period	159	599

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 16: RESOURCE PROPERTY COSTS (continued)

The Group reviewed the carrying value of its assets and cash generating units using a Value in Use CGU valuation. A valuation on Sillaro and Bezzeca fields was calculated by CGG Services (UK) Limited for the purposes of the Admission Document used for the restoration of trading of Saffron Energy Plc on the AIM Board of the LSE.

The parameters used in the valuation model were as follows:

The discount rate applied was 10% post tax (10% at 31 December 2016). As per price assumptions, a price deck provided by specialist advisors CGG Services (UK Limited) for the Competent Persons Report used for the Admission Document referred above. The complete Competent Persons Report is available in the Admission Document of Saffron Energy Plc which can be downloaded on the Company's web site www.saffronenergy.co.uk.

As a result of the revised assessment, the recoverable amounts of the cash generating units (which includes production plant and equipment) of Sillaro was €2.0 million and of Bezzeca was €0.3 million resulting in impairment of €3,595k being recognised in the Financial Statements (€71k of this amount was recognised against the production property, plant and equipment of Sillaro – Note 15).)

NOTE 17: TRADE AND OTHER RECEIVABLES

	Group		Company

- (i) 50,000 shares were issued for cash on 10 November 2016 and on 9 December 2016, the total shares on issue were subdivided into 50,000,000 shares.

All ordinary shares are fully paid and carry one vote per share and the right to dividends. In the event of winding up the Company, ordinary shareholders rank after creditors. Ordinary shares have a par value of £0.001 per share.

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

Share premium reserve

The company has nominal share price of 0.1pence per share. Share Premium Reserve represents value of securities above nominal value.

No dividends were paid or declared during the current period.

NOTE 21: INVESTMENTS IN SUBSIDIARIES

	Company 2017 €'000
Cost	10,000
Impairment	(4,363)
Net carrying value	5,637

The Company's investments in subsidiaries include:

Name	Registered office	Nature of business	Class of shares held	% held
Northsun Italia S.p.A	Italy	Exploration	Ordinary	100%

Group reorganisation

Po Valley Energy in 2016 initiated a capital re-structuring in order to separate its existing production and near-term production assets from its longer-term development assets, with the existing production and near-term production assets being transferred to the Group via the reorganisation of the ownership of Northsun Italia S.p.A.

In January 2017, the Company acquired 100 percent of the shares in Northsun Italia S.p.A from Po Valley Energy Ltd. Consideration of €10,000,000 for the acquisition was settled by the issue of 50,000,000 ordinary shares at £0.0175 each. The transaction resulted in the recognition of a merger reserve of €9,128,000 for the group being the difference between the value of shares issued and the nominal value of the subsidiary's shares received.

NOTE 22: FINANCIAL INSTRUMENTS

Carrying amount versus fair values

The fair values of financial assets and financial liabilities, together with the carrying amounts in the consolidated statement of financial position, are as follows.

31 December 2017	Carrying amount €'000	Fair value €'000
Current financial assets		
Trade and other receivables	664	664
Cash and cash equivalents	365	365
Current financial liabilities		
Trade and other payables	2,100	2,100

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 22: FINANCIAL INSTRUMENTS (continued)

31 December 2016	Carrying amount €'000	Fair value €'000
Current financial assets		
Trade and other receivables	240	240
Cash and cash equivalents	107	107
Current financial liabilities		
Trade and other payables	1,627	1,627
Short term borrowings	802	346

Determination of fair values

The carrying value of cash and cash equivalents, trade and other receivables, trade and other payables approximate their fair value.

The Group does not have any other financial instruments.

Financial risk management

Exposure to credit, market and liquidity risks arise in the normal course of the Group's business.

This note presents information about the Group's exposure to each of the above risks, their objectives, policies and processes for measuring and managing risk, and the management of capital.

Risk recognition and management are viewed as integral to the Group's objectives of creating and maintaining shareholder value, and the successful execution of the Group's strategies in gas exploration and development. The Board as a whole is responsible for oversight of the processes by which risk is considered for both ongoing operations and prospective actions. In specific areas, it is assisted by the Parent's Audit and Risk Committee.

Management is responsible for establishing procedures which provide assurance that major business risks are identified, consistently assessed and appropriately addressed.

(i) Credit risk

The Group is not exposed to significant credit risk. Credit risk with respect to cash is held with recognised financial intermediaries with acceptable credit ratings.

The Group has limited its credit risk in relation to its gas sales in that all sales transactions fall under an offtake agreement with Shell Italia which expires in October 2018. Shell currently has an option to extend the contract a second Gas Year from October 2018 to September 2019.

The Group has a concentration of credit risk exposure to its one customer (Shell Italia). Payment terms are 35 days and the customer has an investment grade credit rating.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset as shown in the table above.

(ii) Market Risk

Interest rate risk

The Group is primarily exposed to interest rate risk arising from cash and cash equivalents that are interest-bearing.

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 22: FINANCIAL INSTRUMENTS (continued)

Currency risk

The Group is exposed to currency risk in respect to monetary assets and liabilities held in currencies other than Euro. The currency giving rise to this risk is primarily Pound Sterling.

	Group	
	2017	2016
Amounts receivable/(payable) in foreign currency other than functional currency:	€'000	€'000
Cash	262	-
Current – Payables	(137)	-
Net Exposure	125	-

The following significant exchange rates applied during the year:

	Average rate		Reporting date spot rate	
	2017	2016	2017	2016
Pound Sterling (£)	1.142	-	1.126	-

Sensitivity Analysis

A 5 percent strengthening of the Pound Sterling (£) against the Euro (€) at 31 December would have increased (decreased) equity and profit and loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. There were no material balances in 2016 that would impact on the currency risk.

	Group	
	Profit or loss	Equity
31 December 2017	€'000	€'000
Pound Sterling (£) to Euro (€)	6	-

A 5 percent weakening of the Pound Sterling (£) against the Euro (€) at 31 December would have the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(iii) Capital Management

The Group's policy is to maintain a strong capital base so as to maintain creditor confidence and to sustain future development of the business, safeguard the Group's ability to continue as a going concern and provide returns for shareholders. The Group currently does not hold any debt instruments. Capital is maintained from issue of new shares (note 20).

The Group is not subject to externally imposed capital requirements.

(iii) Liquidity Risk

The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due.

Refer to the Going Concern note 2(c) for further commentary

NOTE 23: COMMITMENTS

The Italian oil and gas industry operates under a “drill or drop” regime whereby companies are obligated to carry out a work program filed and agreed with the Italian Ministry of Economic Development. The work program can only be carried out however when environmental (and other permitting) approval is received for the various activities. There are no mandatory work requirements for 2018 (the same as was the case for 2017).

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 24: SHARE BASED PAYMENTS

The company issued the following shares in lieu of payments for services rendered:

	No of shares '000s	Value of service €'000
Recognised in profit and loss and other comprehensive income:		
Sara Edmondson – bonus for completion of AIM listing	1,000	57
Spencer Davey – consultant to the Company	1,000	57
Cassiopeia – for services provided	720	41
	2,720	155
Recognised as share issue costs in equity:		
Turner Pope – broker remuneration for completion of AIM listing	1,000	57
Turner Pope – for broker fees	938	42
	1,938	99

NOTE 25: JOINT OPERATIONS

The Group's interests in joint arrangements at 31 December 2017 are as follows:

Joint Operation	Principal place of business	Manager	Group's Interest	Principal Activity (Exploration)
Cascina Castello Production licence	Italy	Northsun Italian S.p.A	90%	Gas

The Group has a farm-out agreement with Petrorep Italiana S.p.A ('Petrorep') which permits Petrorep to earn a 10% interest in the Cascina Castello Production licence. In exchange for a 10% economic interest, Petrorep will commit to the first €600,000 (plus VAT) in capital expenditure for the development of the Bezecca field (located in within the above licence). Contributions of €128,314 have been made by Petrorep for the year to 31 December 2017 (2016: \$521,741) in respect of this commitment

SAFFRON ENERGY PLC

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2017**

NOTE 26: RELATED PARTY DISCLOSURES

Directors' remuneration is disclosed on page 12.

The loan of €3,124,000 advanced from the Company to NSI is unsecured, interest free and does not have fixed terms of repayment.

The Group had received short term funding from third parties related to its ultimate controlling party (Po Valley Energy Ltd) during the year. Loans were on normal commercial terms with interest charged at 10% p.a. There were no amounts payable as at 31 December 2017 (2016: €346,000). Interest paid during the period amounted to €47,228.

All Group's borrowing were from the ultimate controlling party. The movement in liabilities reconciles to cash flows arising from financing activities as follows:

	1-Jan-17	Cash flows	Non-cash changes		31-Dec-17
	€'000s	€'000s €	Foreign exchange movements €'000s	Contribution to equity €'000s	€'000s
Long-term borrowings	1,446	(645)	-	(802)	-
Short-term borrowings	346	(347)	1	-	-
Total	1,792	(991)	1	(802)	-

NOTE 27: ULTIMATE CONTROLLING PARTY

The Group's ultimate controlling party at 31 December 2017 is Po Valley Energy Ltd, an Australian public company listed on the Australian Securities Exchange which holds 50% of the Company's shares.

NOTE 28: SUBSEQUENT EVENTS

Post period end and in support of the proposed merger, new Board and launch of international growth strategy the Company announced it had secured conditional funding of £14,000,000. This was corner-stoned by new investor CIP Merchant Capital Limited. The Company has closed a firm placing raising £561,137.74 with CIP in January 2018 and the balance of £13,438,862.30 remains conditional only subject to shareholder approval which is being sought contemporaneously with the approval for the proposed merger.

Other than matters already disclosed in the financial statements, there were no other events between the end of the half-year and the date of this report that, in the opinion of the Directors, affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group.
